

# Stay Connected with REMIND

Remind is a messaging app used at Weston to communicate with parents about school events. This is a very convenient way for parents to be updated via text messaging. Parents should join their child's class for specific grade level updates that could be sent out. If you have more than one child, parents would join the class for each of their children. It is not necessary to rejoin each year as Mrs. Fereria will just update the name of the class with all of the current parent participants.
